

Panama, a Short Introduction.

The first European to discover Panama was Christopher Columbus in 1494.

Panama is at the center of the Americas and is a country comprised of various cultures and traditions that have created a unique and exotic environment. Indigenous, American, Asian and European cultures combine to create an interesting and wonderful country.

Panama City is the only cosmopolitan city in the world where you can find skyscrapers as well as protected tropical rainforest within the city limits. The city offers historical sites, museums, quaint streets, shopping, and beautiful parks. Within an hour you can visit Taboga Island, breathtaking beaches, the Pacific Coastline, and the Panama Canal.

Panama is a natural land bridge that links North and Central America with South America and its nature is spectacular. Thousands of varieties of flora and fauna flourish in Panama's rainforests and it is host to the largest number of animal species in the world. The Smithsonian Institute of Tropical Research has several bases in Panama. With 954 bird species, more than in all of North America alone, it is a bird watcher's dream. Near Panama City you can tour trails to watch monkeys, watch for elusive jaguars or the Harpy Eagle, national bird of Panama.

On Taboga Island you can watch a large number of interesting bird species, large iguanas, the tiny green dart frog, diverse marine life and much more.

Panama Facts

-The \$US is the primary currency used in Panama; over 100 banks choose Panama to host their local and offshore branches.
